

BILLING CODE 6717-01-P  
DEPARTMENT OF ENERGY  
FEDERAL ENERGY REGULATORY COMMISSION

Columbia Gas Transmission, LLC

Docket No. CP15-95-000

NOTICE OF AVAILABILITY OF THE  
ENVIRONMENTAL ASSESSMENT FOR THE PROPOSED  
TRI-COUNTY BARE STEEL REPLACEMENT PROJECT

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Tri-County Bare Steel Replacement Project, proposed by Columbia Gas Transmission, LLC (Columbia) in the above-referenced docket. Columbia requests authorization to replace about 34 miles of bare steel pipe within Columbia's existing Line 1570 pipeline in three replacement segments spanning Allegheny, Washington, and Greene Counties (i.e., the Tri-County), Pennsylvania. The Project is part of Columbia's modernization program to replace segments of existing, aging, infrastructure in order to improve the safety of its pipeline system and increase service reliability.

The EA assesses the potential environmental effects of the construction and operation of the Tri-County Bare Steel Replacement Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The proposed Tri-County Bare Steel Replacement Project includes replacing 34 miles of 20-inch-diameter bare steel piping with coated steel pipeline at the following locations:

- Segment 1: replace approximately 14 miles with 14.9 miles from the Hero Valve to Waynesburg Compressor Station in Greene County.
- Segment 2: replace approximately 8 miles with 10.7 miles from the Redd Farm Station to Sharp Farm Station in Washington County.

- Segment 3: replace approximately 12 miles with 11.9 miles from the Sharp Farm Station in Washington County to the Walker Farm Station in Washington and Allegheny Counties.

Total construction length with the incorporation of minor reroutes is approximately 34 miles of 20-inch-diameter pipe. The pipeline would also include associated appurtenant facilities including bi-directional pig launcher/receivers, cathodic protection, main line valves, and taps.

The FERC staff mailed copies of the EA to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; newspapers and libraries in the project area; and parties to this proceeding. In addition, the EA is available for public viewing on the FERC's website ([www.ferc.gov](http://www.ferc.gov)) using the eLibrary link. A limited number of copies of the EA are available for distribution and public inspection at:
